

# Lucid-24

## 24x Portable FireWire CD-RW Drive

[www.mcetech.com](http://www.mcetech.com)

### FEATURES AT A GLANCE

- **24x CD-R Recording**  
**10x CD-RW Recording**  
**24x CD Reading**
- **Bus powered**
- **Buffer underrun error prevention**
- **Less than an inch tall**
- **Weighs less than a pound**
- **See-through design**
- **iTunes and Finder burning compatible**
- **Toast CD-recording software and FireWire cable included**

#### Makes Portable CD-Burning All So Clear!

The Lucid-24 Portable FireWire CD-RW Drive by MCE Technologies provides Mac users with an ultraslim and ultraportable way to burn CDs quickly and easily. Just plug it into your computer's bus-powered FireWire port, and the extremely small bus-powered Lucid-24 is ready to write data to standard recordable (CD-R) and re-writeable (CD-RW) CD discs – no power cord needed! Since it weighs less than a pound, the Lucid-24 is clearly light enough to take along just about anywhere.

The sleek transparent styling of the Lucid-24 CD-RW drive nicely complements the contemporary design of the PowerBook G4 Titanium, dual-USB iBook, Power Mac G3 or G4 and the iMac.

Built-in Burn-Proof technology is designed to prevent writing errors caused by buffer underrun, freeing you from the worries of wasting time on a flawed burn session or ruining your CD-R or CD-RW discs.

The high-speed FireWire interface of the Lucid-24 CD-RW drive allows for simple plug-and-play use with a variety of Macs running Mac OS 8.6 through Mac OS X, as well as PCs running Windows 98SE or later for those operating in a cross-platform environment.

Included with the Lucid-24 CD-RW drive is the popular Toast CD-recording software which allows you to create audio CD's, bootable Mac OS CD's, and general backup CD's in a host of CD file formats. The Lucid-24 is also compatible with Apple's free iTunes and Finder burning utilities.

#### Specifications

- Maximum Speed: 24x (Record to CD-R disc), 10x (Re-Write to CD-RW disc), 24x (Read)
- Maximum Data Transfer Rate 3600KB/sec. (Record to CD-R disc), 1500KB/sec. (Re-Write to CD-RW disc), 3600KB/sec. (Read)
